Front-end developer

Three years of experience and a background in Industrial Design.
Collaborated with both designers and back-end developers

Professional Experience

Lead Front-end developer at We Go GreenR

July 2020 - Present | France (Remote)

We Go GreenR is a startup that showcases green apartments for tourists to rent and assists hosts in achieving ecological standards through their app.

- Enhanced webapp performance by optimizing global state management, reducing **Redux** usage in favor of **Next.js** SSR
- Redesigned the homepage to improve UX and boost client conversions.
- Created a design system in **Figma** based on the current branding to improve UI consistency and speed up the design process.
- Implemented the new homepage using **TypeScript**, **Tailwind CSS**, and **Next.js** (React), creating reusable components as part of the new design system.
- Decreased bug reports introducing automated testing with **React Testing Library**, **MSW**, and **Jest**.
- Led the recruitment of 3 junior developers, and mentored 4 team members on best practices such as semantic **HTML** and **Git** workflows like Gitflow helping them achieve autonomy as fast as possible.
- Advocated for and implemented agile methodologies. Served as **SCRUM** master optimizing team workflow and development efficiency.

Freelance Front-end Developer at Aves Argentina

July 2022 - November 2022 | Argentina (Remote)

Aves Argentinas contacted me to develop kbadeargentina.org, a website that promotes regions of Argentina to be Key Biodiversity Areas (KBA).

- Built a website from the ground up using **Next.js**, **React**, **TypeScript**, and **Styled-Components**.
- Developed an interactive map using **OpenLayers**, enabling users to dynamically visualize and filter KBA locations
- Implemented search functionality allowing users to find specific KBA regions, animals, or plants.
- Conducted design reviews to ensure adherence to project requirements, enhance visual appeal, and meet deadlines.
- Leveraged **Vercel** for CI/CD deployment, ensuring good development experience and facilitating maintenance.
- Simplified data integration with a **Node.js** tool to migrate data from Excel to JSON format, minimizing friction with the client accustomed to Excel.

Front-end Developer at We Are PSh

November 2020 - July 2022 | Argentina (Remote)

We Are PSh is a software factory specializing in edtech where I started my professional journey in tech.

- Revamped the company website using **Gatsby** and **React** enhancing site performance, SEO, and developer experience.
- Integrated **Lottie** animations, improving the site's visual appeal and interactivity.
- Increased website performance going from 75 to 98 in Google Lighthouse scoring, contributing to higher search engine rankings.
- Developed an internal blog for We Are PSh, utilizing **React** and **Strapi**.
- Contributed to multiple client projects, web apps, custom forms, and marketing sites using **Node.js**, **TypeScript**, **React**, and **Next.js**.
- Guided 4 junior developers during the onboarding of our team.

Education

Audited Operative Systems Course at Universidad Técnica Nacional

July 2024 | Argentina

Bachelor of Industrial Design at Universidad de Buenos Aries

December 2021 | Argentina

Full Stack Web Development Bootcamp at Soy Henry

October 2020 | Argentina

Courses

English First Certificate (FCE) B2 - Cambridge English

January 2014 | Argentina

Epic React - Kent C. Dodds

February 2024 | Argentina

Languages

English: Fluent **Spanish:** Native

Main Technologies

JavaScript, Typescript, HTML5, CSS3, React.js, Next.js, Node.js

Version Control & CI/CD

GIT, GitFlow, Github, Vercel, Netlify

Complementary Technologies

Linux, SQL, PostgreSQL, SQLite, C, Bash, Docker

Design Tools

Figma
